KIRA KRUMM has been distinguished by her innate ability to transform both sophisticated and style into the structural confines that ultimately serve as homes. From the posh palaces of Park Shore and Pelican Bay, to the regal estates of Port Royal and Medterra, Krumm's designs have graced some of southwest Florida's most awe-inspiring interiors. An Interior Design major from Virginia Commonwealth University, Krumm went on to attend the prestigious American College in London as a World Study Scholar. While these experiences provided an educational foundation, Krumm says the real learning has come from 20 years of working with discriminating clients. "We learned that the process requires a disciplined, hands-on approach, unwavering attention to detail and an uncompromising commitment to fulfilling the client's expectations," Krumm says. She works closely with clients to design environments that are aesthetically pleasing and supremely functional. As her numerous awards indicate, Krumm's passion for artistry and excellence creates unparalleled homes.
